

HTML Basic Beginners Project

Here is what you need to know for this project:"

"H1" Is the title and "Center" is how you center it.

That's it! That's all you need to know.

For this project you have been given a document, either online or on paper.

⚠ Make sure to open it with a Code Editor for this to work!

It should look something like this (...The colors don't matter)

```
1 <!DOCTYPE html>
2 <body>
3   <center><h1></h1></>
4 </body>
```

If you are not using a computer, use the next page instead.

Fill in the Title that says "My new webpage" and make sure that it is centered. After that, open it in your web browser and see if it worked. If you are doing it on a sheet, you should use the answer key to check it over or ask a teacher for help. If you are using a computer and need help, you can reference the on paper version below for help.

This is in fact a very basic project and should not take longer than a couple minuets.

For those using paper....

```
<!DOCTYPE HTML>  
<body>  
  <center><h1>_____</h1></____>  
</body>
```
