CSS Worksheet

This worksheet is made up of, 4 short answer questions, one multiple choice, and one "specialty" question. Try your best to answer them without looking back, if you need to, you may.
This sheet is out of a total 25 points

Write out the code for the following: (8pts)

- **Connecting a Stylesheet**

- **Adding a style inside a HTML element**

- **Write 2 sentences on what the RGB and HEX codes do inside a style**

Multiple Choice (2pts)
1. How many (main) different ways are there to style HTML?

A. 6
B. 3
C. 1
D. 7

Short Answer (2pts /each)
1. In what type of document do "style" tags show up in?

2. Why do you not have to specify which element your style is set to when the style is inside the element?

3. What HTML element is used to connect stylesheets with the index.html?

4. Why is having a stylesheet helpful?

5. Name one thing that can define a color within the "style" tags (2)

Extra Credit: (1pt /each)

6. What happens if you apply the styling of the background color to the "body" element?

7. What is one thing source can do for you to help with CSS?
